Subject: Leukos funding

Dear Toni, Evarist and Carles

As you probably already know, ACCIÓ has granted us an award of €50,000. It is the funding we sought in October 2015 for a development project that will make it possible to exploit the patent transferred by the IJC.

In order to receive the funding we must first disburse the amounts specified in the application, namely:

Breakdown of the outlay for own and contracted staff for the project

Name	Post held	Research or development	Hours	Cost / hour (€)	Amount (€)
Ruth Muñoz Risueño	CSO	D	170	30.14	5,123.80
Maria Carmen Lara Castillo	Lab technician	D	350	15.07	5,274.50
Total					10,398.30

Breakdown of the outlay for the acquisition of equipment and other apparatus for the project

Description	Supplier	Research or development.	Number	Amount (€)
Molecular biology reagents	x	D	1	29,500
Cell culture	x	D	1	17,300
Animal unit	x	D	1	14,300
Total				61,100

TOTAL: €71,498.30

With this project Ruth will be able to finish all the remaining pre-clinical tests: above all the administration of apomorphine in mice in combination with Ara-C in optimised doses.

Once we have the invoices for the outlay, the pay slips (TC2) and the project technical report we will be able to justify these expenses to ACCIÓ and receive the funding.

At the present time Leukos could finance the project, but we would be left without funds.

For this reason I would like to request a loan from the Josep Carreras Foundation to carry out the project and as soon as we justify the expenses to ACCIÓ and they transfer the funding, Leukos will return the loan to the Josep Carreras Foundation.

The amount of the loan would be €50,000, the amount of funding obtained (70% of the fundable cost), Leukos will cover the remaining 30% not funded by the award (€1,498).

Please let us know what you think about this, and your approval if you agree.

I attach the resolution concerning the funding together with an Excel chart detailing the project budget.

Please do not hesitate to contact me if you have any doubts.

Many thanks and best regards,

Quique
